

Culture Project

Purpose: Analyze the importance of culture upon world view with a beginning look at individual culture.

Style: Photo essay, portfolio/scrapbook format or presentation format

Time: 2 weeks (Due September 8th)

Students are to take pictures of places and things important to them. Each picture should include a description of the picture and why it is important to the student. Pictures can include, but are not limited to: family gatherings, sports events, places, nature, home, school, friends, belongings, community events, important buildings, and places they've been. The pictures presented should represent the culture of the student.

Before the project we will discuss geography and geographical influences. How does where we live influence our life? (Speech, food, dress, action) How do you think it influences our thoughts and beliefs? If we lived in another country would we still hold the same beliefs as we do in this country? What about a different region of this country? What shapes your personal culture?

Be prepared to explain your product.

20 images minimum

There are very few restrictions with this assignment. Ask questions if you have concerns.

The only writing you have to do is the description of the image and reason for including it.

Why did I ask you to reflect on the questions? I plan on asking you about it later and if you have participated in the written reflection you will not struggle with an answer.

Post questions on your page or email. I will get back to you asap.
